(54) METHOD AND DEVICE FOR WAVEFORM SHAPING OF SIGNAL LIGHT BEAM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a method, through which a practically optimum threshold is obtained and a proper reproducing operation is made possible.

SOLUTION: The method is provided with a step that provides a waveform shaper, which properly shapes waveforms of input signal light beams and outputs output signal light beams, a step in which the quality of the output signal light beams is measured and a step in which power of the input signal light beams is controlled to improve the quality being measured.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
